

AZOPLATE

DIVISION OF AMERICAN HOECHST CORPORATION

50 MEISTER AVENUE, SOMERVILLE, NEW JERSEY 08876

TELEPHONE (201) 685-2000

MY DIRECT DIAL NUMBER IS 685-2046

U. S. Environmental Protection Agency
Hazardous Waste Site Branch
26 Federal Plaza
New York, NY 10278

Attn: Mr. John Frisco

Dear Mr. Frisco:

We forwarded EPA Form 8900-1, Notification of Hazardous Waste Site, reporting the existence of 3 waste solvent tanks at our Murray Hill location. These tanks have not been used for several years, and will be removed and discarded soon.

This is to advise you that the Azoplate Division of American Hoechst Corporation listed as the owner of these tanks has recently changed its name to the Technical Information Systems Division. You may want to change the name listed on the EPA Form 8900-1 submitted to avoid confusion.

We will notify you as soon as these tanks are disposed of so that our Murray Hill site can be removed from your inventory.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'A. R. Brubaker'.

A. R. Brubaker
Manager, Environmental Services

We have a new name!

Things are happening at Azoplate. We're growing, we're diversifying, we're moving, and we're changing our name.

In fact, we have already changed our name from the Azoplate Division to the *Technical Information Systems Division*. We needed this umbrella-type name since our division now includes three different product groups:

Enco® Printing Products - Enco presensitized offset plates and Encomatic® plate processors, Naps® and Paps® overlay color proofing film and processors, Multiplater™ step-and-repeat machines, and direct photo emulsions for screen printing.

EOCOM® Electronic Systems - laser equipment for exposing images directly on offset plates or film.

AZ® Photoresist Products - essential to the fabrication of micro-electronic circuits used in products such as computers and calculators.

Enco Printing Products and AZ Photoresists are manufactured in Branchburg, N.J. EOCOM, a former division of American Hoechst, is located in Tustin, California.

Since these three groups manufacture products for the communications industry, their interface with one another, especially in the research and development area, will benefit all.

And Enco headquarters is moving! Between now and November 1, we will complete the move to our new headquarters building in Branchburg, New Jersey.

We will keep you advised as new developments occur. In the meantime, call us Technical Information Systems (TIS) Division, call us Azoplate, call us ENCO, AZ, or EOCOM -- but be sure to call us, and see how we respond.

Sincerely yours,

D. J. Phelan
President
